

**About M.Phil./ Ph.D.**

The P.G. Department of Chemistry is involved in both teaching and research. In teaching the Department is training the next generation students and enable them to lead the nation in chemistry. The training received by the students enabled them to achieve major positions in industries, research & academic institutions. The competency of the Department in research ranges material science, gas sensing, Photodegradation, Green Chemistry, Natural dyes and Nanomaterials. The department has also signed MoU with organizations. The Department has also produced distinguished Alumni among which many have been placed in academic, industries and Civil services. The department has received grants from both UGC (under Innovative programme Green Chemistry and Crop Protection programme) and DST under FIST (Phase I) programme. Students received Schollarship from SARTHI
